

Technical drawing of a metal bracket (Fig. 10). The drawing shows two views: a front view (top) and a side view (bottom). The front view shows a bracket with a central horizontal section and two vertical sections. The dimensions are: 28 (width of the central section), 28 (width of the vertical sections), 94 (total width), 122 (total width including mounting holes), 20 (height of the vertical sections), 26 (height of the central section), 3 (thickness of the central section), and 8 (thickness of the vertical sections). The side view shows a bracket with a central horizontal section and two vertical sections. The dimensions are: 28 (width of the central section), 28 (width of the vertical sections), 94 (total width), 122 (total width including mounting holes), 20 (height of the vertical sections), 26 (height of the central section), 3 (thickness of the central section), and 8 (thickness of the vertical sections). The side view also shows a central section with a width of 28 and a height of 26. The side view also shows a central section with a width of 28 and a height of 26. The side view also shows a central section with a width of 28 and a height of 26.

We reserve the right to introduce changes in performance, configuration and technology, dimensions, weights and materials in the course of technical progress. The figures are shown without obligation.
